Brand essence

Routine runs itself

Who I am

I'm Zakhar, a marketer who learned to build. I make smart automations, Telegram bots, CRM integrations and websites for businesses in Dubai, Cyprus and Belarus.

Mission

Give people their time back. Everything that repeats every day should run on its own, so people can do what they love.

Brand promise

"Show me what you do by hand, and I'll figure out how it can do itself."

This sentence sits under every text, button and animation. If an element doesn't help people understand it, it doesn't belong.

Values and character

What matters to me

Works in production

Not a mock-up, not a deck. Every piece is live, you can open it and try it.

Honest numbers

55 listings, 118 nodes, 2 minutes. Only what was actually measured.

Warmth

I talk like a friend: polite, simple, with a smile. No jargon, no snobbery.

Nothing extra

Less code, fewer services, fewer words. A simple fix beats a clever one.

Character

A calm professional with a sense of humour. Like Jarvis: knows everything, never in a rush, always glad to help.

We are

friendly, precise, technical, alive

We are not

cold, pompous, templated, shouty

Logo

A letter that comes alive

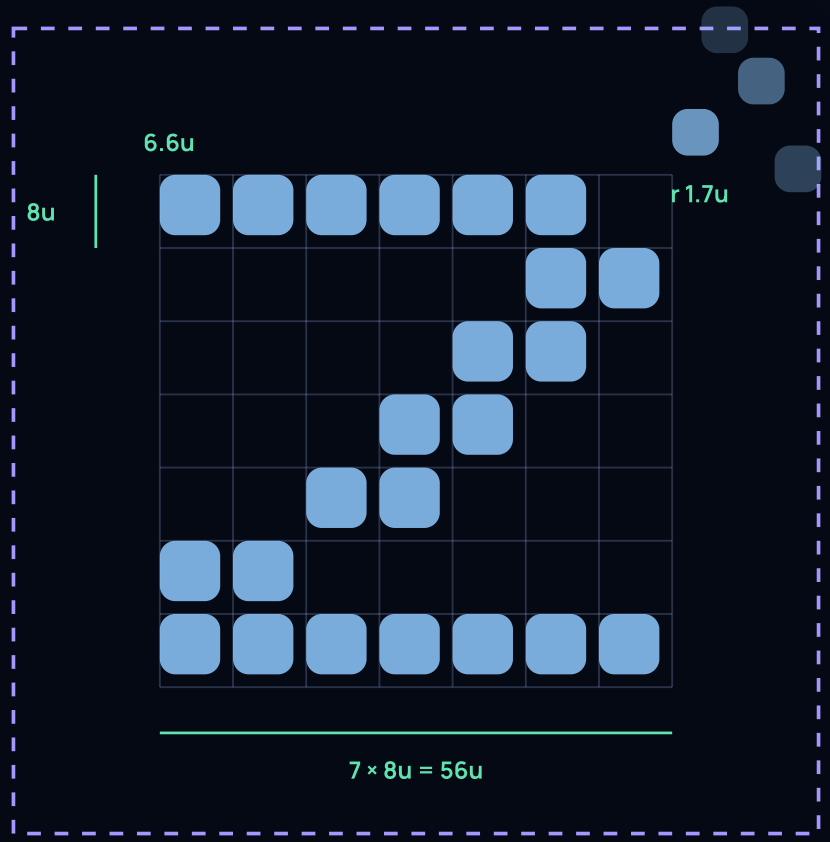

The mark is a Z built from tiles on a 7×7 grid. The corner tile breaks away and drifts off as particles, just like my portrait on the home page assembles from dots and scatters under the cursor.

The idea is simple: manual routine breaks into pieces and flies away, leaving a clean, working system.

Hover the mark and the tiles scatter

Logo / construction

Grid and module

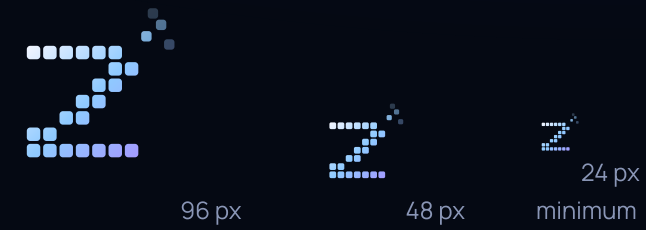

Parameter	Value
Module u	1/94 of the box side
Cell	8u
Tile	6.6u, gap 1.4u
Tile radius	1.7u
Diagonal	2 tiles wide
Particles	4 tiles at 78%, opacity 85/55/35/25%
Gradient	#F2F5FF → #8FCAFF → #A597FF, 135°

Logo / clear space and size

Let it breathe

Clear space equals two grid cells (16u) on every side. No text, screen edges or other marks inside it.

Mark: at least 24 px on screen and 8 mm in print. Below 24 px use the app icon, tiles read better on the dark plate.

Logo / variants

Four versions

Primary mark

On dark backgrounds. The main version.

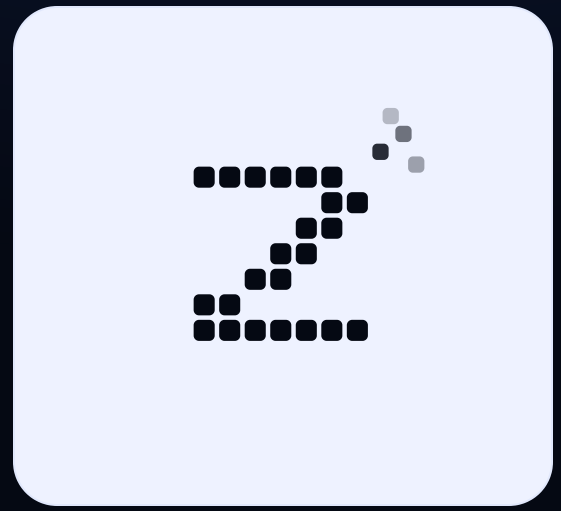

App icon

Avatars, favicon, shortcuts.

Mono light

On coloured and photo backgrounds.

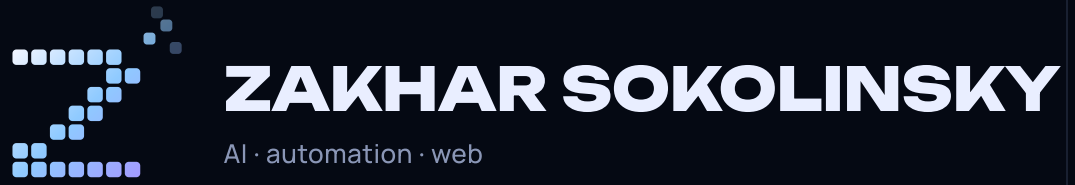

Mono dark

Light documents and print.

Logo / lock-ups

Mark and name

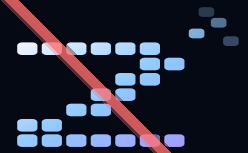

Horizontal: site header, email signature, documents. Mark height equals two name lines, gap to the name is 1/4 of the mark.

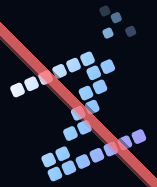

Vertical: covers, business cards, square formats. Name centred, gap to the mark is 1/6 of its height.

Logo / don’ts

Six mistakes

Don’t stretch

Don’t rotate

Don’t recolour

No shadows or outlines

No light background without mono

Don’t add words to the mark

Colour

Night sky and ice

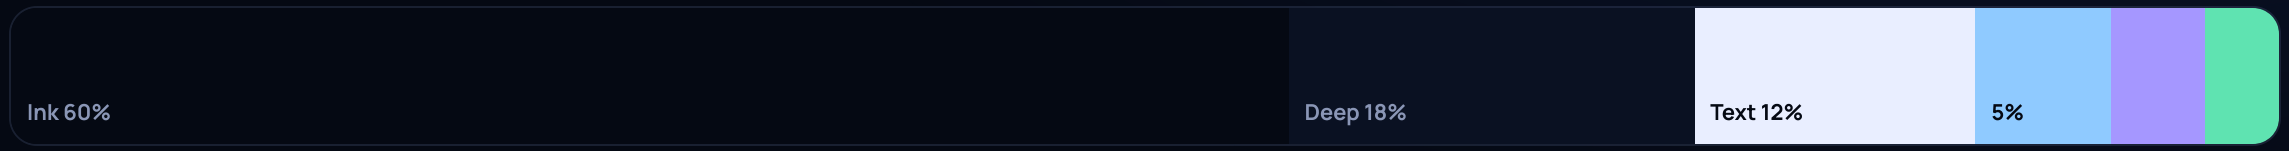

Ink is the background. Deep is cards and plates. Text, Mute and Dim are three text levels. Ice and Peri are accents and gradients. Mint is only for "online" status and success.

There is no red or orange in the brand. Errors use a soft pink #FF9D9D, in UI only.

Colour / ratio and gradients

Lots of calm, a little light

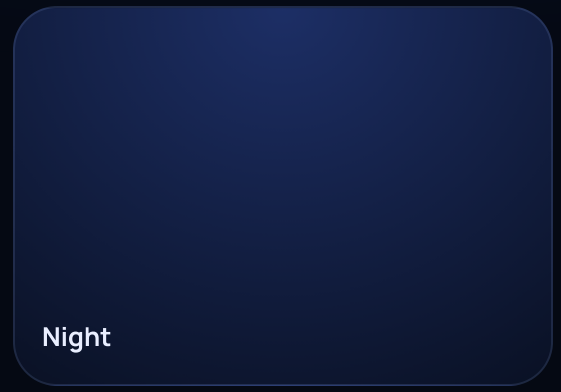

Large headings only, top to bottom.

Toggles, progress, dots, particles.

Jarvis orb only.

Call-to-action blocks and the curtain.

Colour / accessibility

Readable by all

Ratios are computed with the WCAG 2.2 formula. Body text stays at AA (4.5:1) or higher. Dim is fine for captions from 13 px.

	Text / background	Ratio	WCAG
Aa	text / ink	17.2:1	AAA
Aa	text / deep	16.3:1	AAA
Aa	mute / ink	6.7:1	AA
Aa	dim / ink	5.7:1	AA
Aa	ice / ink	11.4:1	AAA
Aa	peri / ink	8.0:1	AAA
Aa	mint / ink	12.4:1	AAA
Aa	ink / text	17.2:1	AAA
Aa	mute / glass	6.3:1	AA

Typography

Three voices

Aa Zz

Unbounded

Headings, numbers, labels. 600 and 800. Wide and confident.

Aa Zz

Manrope

All text and UI. 300 for leads, 400 body, 700 emphasis.

Aa Zz

Cormorant Garamond

Italic only, one or two words in a heading. Softness and warmth.

All three fonts support Cyrillic. Loaded from Google Fonts, display=swap. Fallbacks: system-ui and Georgia.

Typography / scale

Display	Hello	Unbounded 800 · 42-118 · -0.045em
H1 case	Bitrix24 → PF	800 · 38-80 · -0.045em
H3	Project card	600 · 17-20
Lead	Hello, dear friends!	Manrope 300 · 18-21 · 1.55
Body	Body text, no more than 60 characters a line.	400 · 17 · 1.65
Kicker	Favourites	700 · 14 · ice
Caption	Caption under a number	400 · 13 · mute

Rules: no all-caps labels, no em dashes (hyphen only), «guillemets» in Russian and "quotes" in English, numbers always in Unbounded.

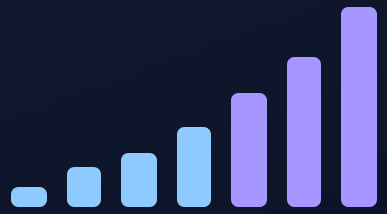

Rhythm and softness

Grid

12 columns, up to 1400 px wide, margins 16-56 px (4vw). Work cards: columns from 360 px.

Spacing

Scale: 8, 16, 22, 32, 46, 60, 110. 110 px between sections, 80 px on phones.

Radius

32 large cards, 22 nested blocks, 14 small plates, 99 buttons and chips. No sharp corners.

Buttons and toggles

Pill buttons

Write to me

All work

↘

One light button per screen, the main action. The rest are glass. On the site buttons are magnetic and lean toward the cursor.

Toggles and chips

Motion

Blue

RU EN

n8n

Telegram API

GSAP

Bitrix24

Toggles are clickable right here. Chips are for technologies and tags only, never actions.

Glass and light

Glass card

Translucent blue, 16 px blur, a 14% border and a border glow that follows the cursor. Try moving your mouse here.

EQT Real Estate

Bitrix24 → PF

Tilts with the cursor, glares, preview scrolls.

J

Jarvis

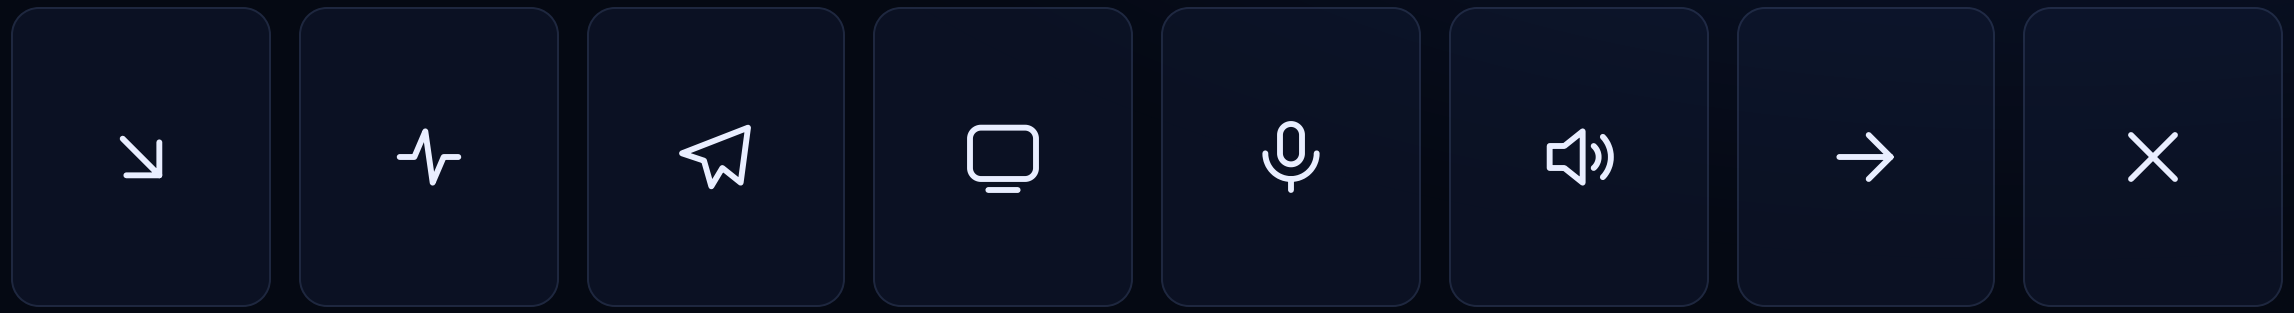

helper, online

Good day! What shall I show?

Show me bots

Iconography

A thin line

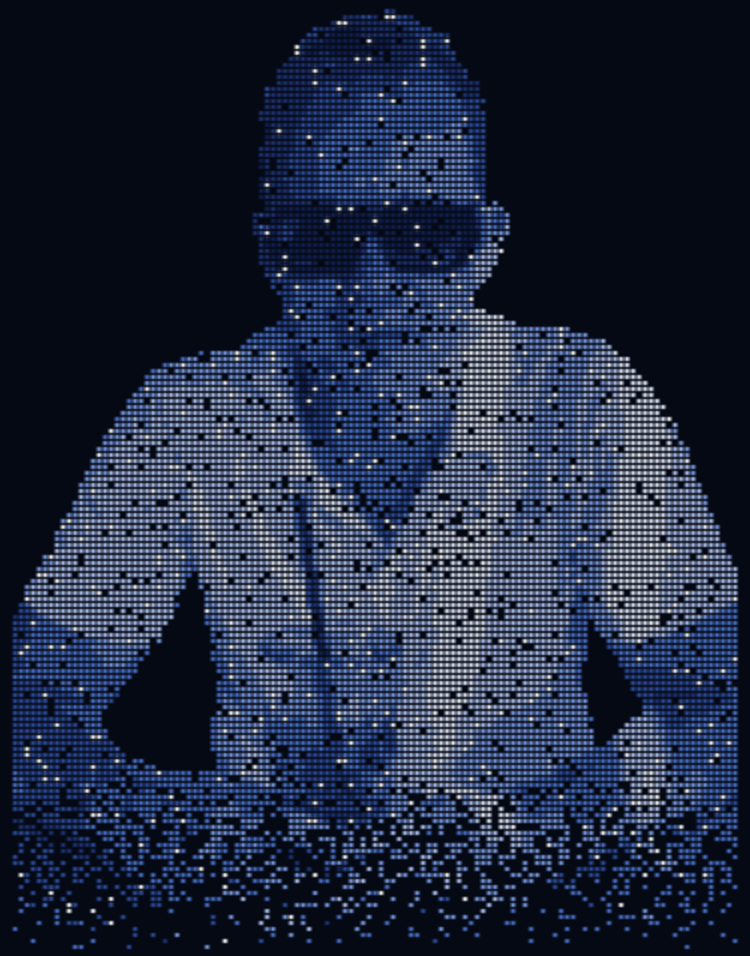

24 px grid, 1.6 px stroke, round caps and joins, no fills.

An icon sits next to its heading, not in a tile above it.

Icon colour equals the text colour or Ice. No emoji in the UI.

Imagery

Particle portrait

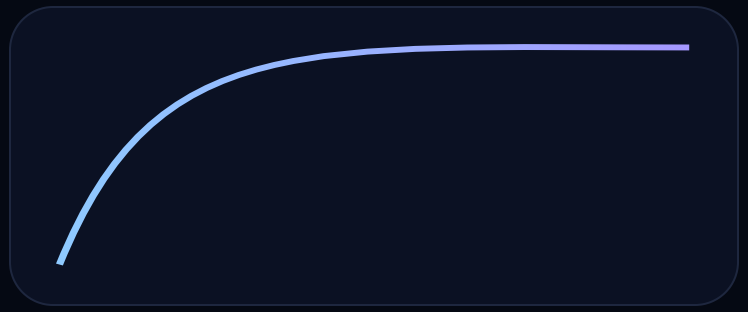

The photo is cut from its background (rembg) and split into 3-4 px tiles. Colour maps to seven shades of blue, 4% of tiles are white sparks. Tiles gather, part under the cursor and scatter on scroll.

Work screenshots

Capture at 1440 px wide, full page, save as WebP q80. In a card: top-aligned, 32 radius, thin border. On hover the screenshot slowly scrolls down like a live site. No phone-on-a-desk mock-ups, no blurry frames.

Motion

Smooth as breathing

Easing

expo.out `cubic-bezier(.16,1,.3,1)` for reveals, expo.inOut for the curtain. No springs or bounces.

Curtain

Between pages: in 0.55 s, section name, out 0.65 s.

Particles

Spring 0.045, damping 0.86, cursor radius 120 px.

Token	Duration	Where
micro	0.2-0.3 s	hover, toggle
reveal	0.6-1.0 s	blocks on scroll, stagger 0.05-0.1 s
hero	1.2-1.4 s	intro, letter-by-letter headings, portrait

With prefers-reduced-motion or the Motion toggle off, all motion stops.

Voice and tone

Like a friend

I write in the first person, warmly and politely. I tell, not sell. Short sentences, simple words, honest numbers, a bit of a smile.

- Address: "you", "dear friends"
- No em dashes, no all caps
- A button says what happens: "Write to me"
- Errors without apologies, with a way out

Do	Don't
Hello, dear friends! Let me show you around.	Providing a full range of digital services.
A couple of minutes later the listing is live.	An innovative solution for business process optimisation.
I didn't catch that, try again or type it.	ERROR! Recognition unavailable.
