

BRAND BOOK

HOW INKSIDE LOOKS AND SOUNDS

tattoo studio, Minsk, Makayonka lane 4, unit 64

version 1.0, October 2026

CONTENTS

WHAT'S INSIDE

01 ABOUT THE BRAND 03
positioning, artists, audience, tone of voice

02 LOGO 07
versions, clear space, misuse

03 COLOUR 10
palette, roles, glass, glows

04 TYPOGRAPHY 13
four typefaces and a scale

05 GRAPHICS AND TEXTURE 15
mural, grain, embers, glass

06 PHOTOGRAPHY 17
works, artists, shooting rules

07 COMPONENTS 19
buttons, cards, price list, forms

08 STRUCTURE AND MOTION 23
sections, mobile, animation

09 COMMUNICATIONS 26
Telegram bot, Instagram, gift card

10 TEMPLATES 28
post, story, business card

Single source of truth for every value in this book: the inkside.by site code (index.html, img/ files). Colours, sizes and timings come from the CSS and were checked against computed browser styles at a 1440 px window. Where the site sets nothing, the book says so and marks the rule as a brand book rule.

A TATTOO YOU WON'T REGRET

EVEN IN 10 YEARS ✦

positioning

The brand's main line. It sits on the first screen of the site and sets everything else: work that stands the test of time, a price before the session and no pressure to decide.

On the site, a process video in an amber-framed 2 px capsule is set inline after the word "Tattoo": the headline literally shows how the work is done.

STUDIO

WHO WE ARE AND WHERE TO FIND US

INKSIDE is a tattoo studio in central Minsk. Two artists, realism and large projects, cover-ups of old work. We discuss your idea for free and name the price before the session.

address	220114, Minsk, Makayonka lane 4, unit 64
hours	daily 11:00-23:00, by appointment
contact	bot @inkside_bot, Instagram @inkside.minsk, Viber
services	b&w and colour realism, sleeves and legs, tattoo and scar cover-ups, touch-ups, graphic, mini and fine line
prices	minimum 180 BYN (up to 1 hour), each extra hour 150 BYN, sketch from 40 BYN, consultation 0 BYN

BRAND CHARACTER

HONEST

Price before the session, "no-surprise prices", free consultation. The artist will tell you straight if the idea works.

CRAFTSMAN

Realism, sleeves, complex cover-ups. We let the work speak: only our own photos on the site, no stock.

STREET, NOCTURNAL

Graffiti mural, chrome gothic lettering, a neon "OPEN till 23:00" sign, embers in the dark.

CARING

Sterility comes first, needles are unpacked in front of the client, day-by-day aftercare and a check-up a month later.

8+	№1	2	0 BYN
years behind the machine	sterility and safety come first	days for a full leg, four hands	for consultation and idea development

figures: the "facts" block on the site, the second number is always amber chrome

NADYA

NADEZHDA

FINE LINES AND COLOUR

- micro-realism
- colour realism
- b&w realism
- large projects
- cover-ups of old tattoos
- touch-ups of old work
- mini and fine line

Turns a vague idea into a clean, neat sketch. A good choice for a first tattoo.

INSTAGRAM AND TIKTOK
@ST.NADYA_TATTOO

VITALIY

VITALIY

REALISM AND SLEEVES

- b&w realism
- sleeves and legs
- cover-ups of old tattoos
- mini tattoos

Takes on large projects and complex cover-ups of old tattoos.

INSTAGRAM @INKSIDE.MINSK

TWO ARTISTS. FOUR HANDS.

AUDIENCE

derived from the site's copy and offers; the site sets no age or gender

- **First tattoo.** Afraid of mistakes and pain. They need the "Does it hurt?" FAQ, a free consultation and Nadezhda as "a good choice for a first tattoo".
- **Large project.** Sleeve, leg, back. They look at realism and "2 days for a leg, four hands".
- **Unhappy with an old tattoo.** Cover-up and touch-up, a dedicated block and a bot entry tagged cover.
- **Gift.** A gift card for any amount, peaking before New Year.

artist photos on the site are b&w by default and turn colour on hover (filter 0.7 s)

TONE OF VOICE

HOW AN ARTIST TALKS TO A PERSON

HOW WE WRITE

- **Polite, but human.** Like an artist in a chat, not a salon in an ad.
- **Short.** One thought per sentence. Headlines up to four words.
- **Specific.** Numbers, BYN, days, centimetres: "up to 5 cm", "in a month", "from 180 BYN".
- **No pressure.** We remove fear: "No obligation", "We take breaks when needed".
- **Button = action.** "Get my tattoo price", "Send a photo", "Order a gift card".
- **Hyphen, not dash.** All copy uses only the short "-", with spaces.

HOW THE BRAND SOUNDS

> “Two artists, 8+ years of experience. We'll discuss your idea for free and name the price before the session.”
>
> site, first screen

> “Describe your idea in a few words. The artist will tell you honestly if it suits you and what it will cost.”
>
> site, last screen

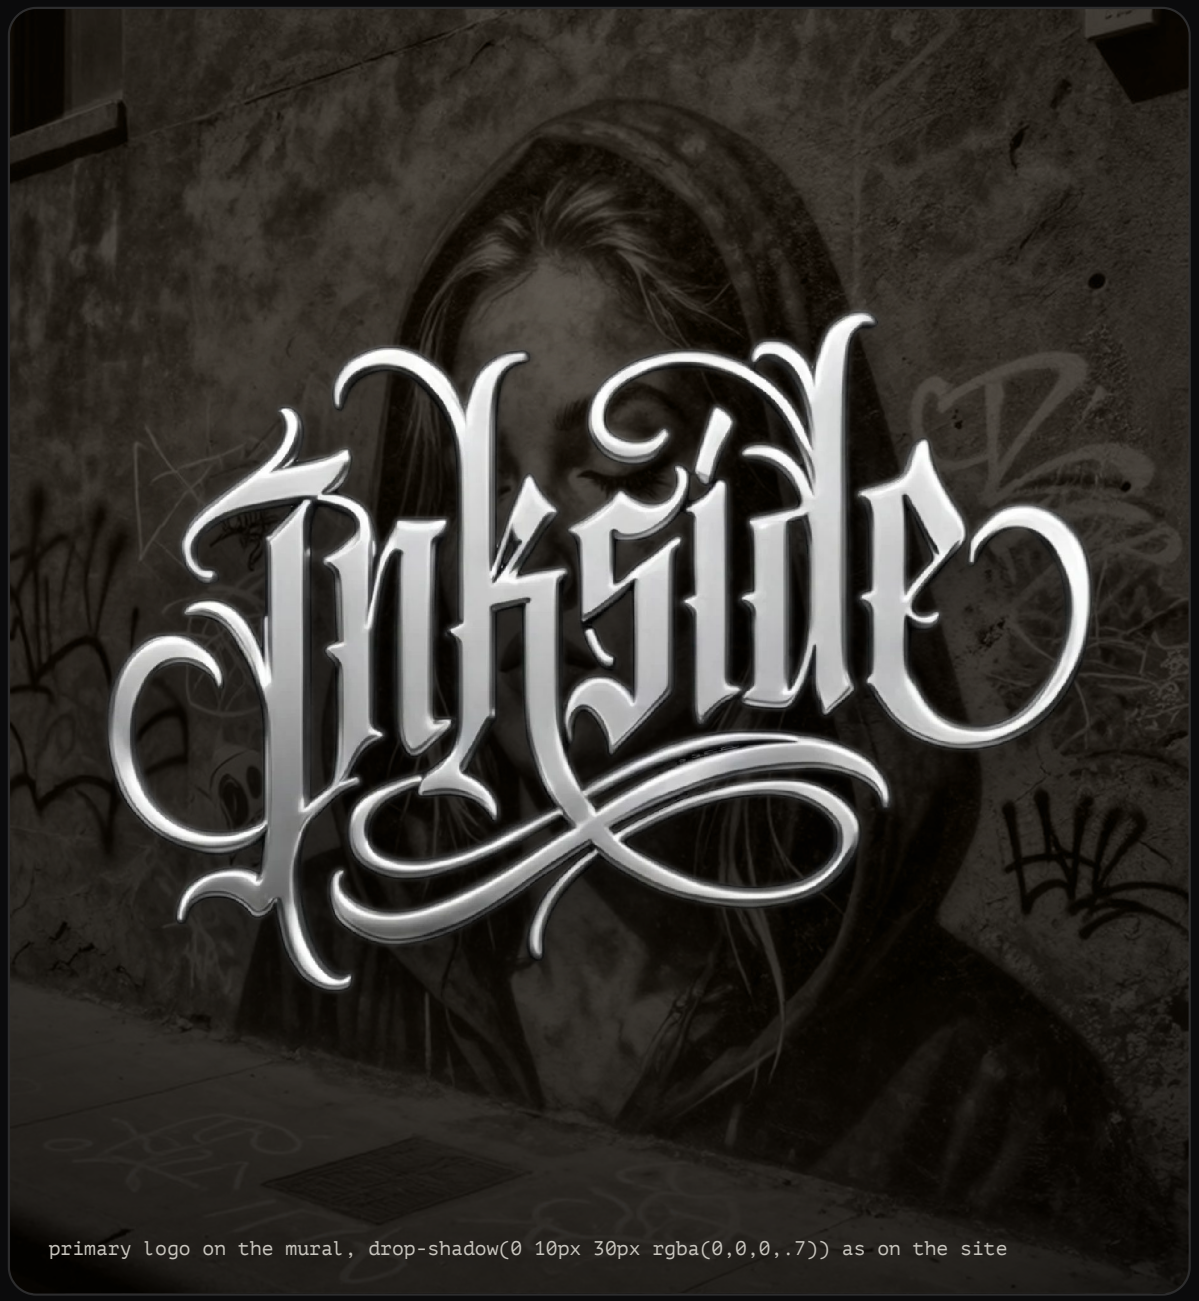

> “Peeling and itching are normal. No scratching, no sauna, pool or sea.”
>
> site, aftercare by day

> “The artist will message you here to discuss the sketch, size and date.”
>
> bot, request accepted

WHAT WE AVOID

we don't write	we write
~~We provide artistic tattooing services~~	We do realism, sleeves and cover-ups
~~Immerse yourself in the world of skin art~~	See the work
~~A unique experience that will change your life~~	A tattoo you won't regret even in 10 years
~~Pricing is calculated individually~~	Minimum 180 BYN, price named before the session
~~BOOK RIGHT NOW!!!~~	Get my tattoo price

We also avoid: long dashes, bureaucratic language, AI clichés ("unique", "immerse yourself", "discover"), repeated exclamation marks, emoji in site copy (the site uses only the star ✦). Emoji fit the bot, see chapter 09.

primary logo on the mural, drop-shadow(0 10px 30px rgba(0,0,0,.7)) as on the site

LOGO

CHROME GOTHIC SCRIPT

Primary. The word Inkside in a calligraphic gothic script with flourishes, in polished 3D chrome. It is a raster file img/logo.webp, 900 × 624 px, with a transparent background. The chrome is baked into the file: colour and highlights stay as they are.

Where it lives. Loading screen, first screen (up to 300 px), gift card (170 px), on mobile over a photo (132 px).

Shine. On the first screen a light streak sweeps the logo every 5.5 s (masked to the logo shape, screen blend), with a twinkling star ✦ beside it.

There is no vector source in the site repository. Print larger than A5 needs a vector or a file of 3000 px or more.

Monogram. The letters IS woven into one mark, with the caption INKSIDE TATTOO. File img/mono.webp, 144 × 200 px.

Used in the navigation (38 × 38 px) and as a watermark in the bottom right of work photos. Site icon img/icon.png (180 px) - the monogram on dark.

CLEAR SPACE

x = ¼ of logo height on all sides. No text, frame edges, buttons or other marks inside it. For the monogram x = ⅓ of its width.

Brand book rule: the site sets no clear space. The closest is the first screen, with 18 px under the logo before the headline at 300 px width.

MINIMUM SIZE

30 mm print
120 px screen

10 mm print
32 px screen

Below this the flourishes merge. The smallest logo on the site is 132 px (mobile), monogram 38 px (menu).

BACKGROUNDS

ok: ink #0b0b0c

ok: darkened mural

ok: amber glass

ok: dark photo with shadow

The logo lives only on dark. The chrome reads through contrast with the ink and the warm shadow of the mural.

DON'T

SIX MISTAKES THAT BREAK THE CHROME

× don't: recolour. Chrome is never gold, red or amber

× don't: stretch or squash. Scale proportionally only

× don't: tilt. All tilts were removed from the site, the brand stands straight

× don't: place on amber. It's an accent for buttons, not a logo background

× don't: place on light. Chrome gets lost on paper and white

× don't: add coloured glow, outlines or neon around the mark

Also: don't type the name in a font instead of the logo where the mark is needed (navigation, cover, signage). INKSIDE set in Dela Gothic One is allowed only as a utility label: in the price list, in the booking form header.

PALETTE

INK, CHROME AND AMBER

A near-black stage, warm light and one accent.
Values from :root in index.html.

INK

The background of everything. Page colour, browser theme-color, text on light buttons on hover.

--ink
#0B0B0C
rgb(11, 11, 12)

AMBER

The only accent: main button, active tab, selected option, marquee, numbers, progress lines.

--stencil, --red
#E8A33A
rgb(232, 163, 58)

LIGHT AMBER

Handwritten captions, focus, aftercare dates.

--stencil-l #F6C56E
rgb(246, 197, 110)

ON ACCENT

Text on amber buttons and chips.

--on-acc #170F04
rgb(23, 15, 4)

TEXT

Headings and body text.

--text #F2F0EB
rgb(242, 240, 235)

DIMMED

Paragraphs, captions, inactive menu.

--dim #C9C6BF
rgb(201, 198, 191)

MUTED

--mute #8F8B84, rgb(143, 139, 132)
labels, footer, secondary captions

FRAME

#111113, rgb(17, 17, 19)
work photo frames

WARM BASE

#3B2D1B, rgb(59, 45, 27)
mural underlay

EMBER

#FFD28A, rgb(255, 210, 138)
background sparks

unused tokens remain in CSS: --ink2 #151517, --paper2 #D9D1C0; --paper #E9E3D6 shows only in the "Back to contents" link

ROLES AND GLASS

HOW COLOUR IS DISTRIBUTED

PROPORTION

a guide, not a measurement: ink and mural about 85 %, text about 10 %, amber up to 5 %. With more amber it stops leading to booking.

GLASS

Almost every block on the site is a glass sheet over the mural. Final values after all CSS layers:

fill	`rgba(10, 10, 11, .62)`
backdrop blur	`backdrop-filter: blur(16px) saturate(1.1)`
edge	`1px solid rgba(255, 255, 255, .14)`
shadow	`inset 0 1px 0 rgba(255,255,255,.12), 0 30px 80px rgba(0,0,0,.5)`
radius	`18px (--r)`
base token	`--glass rgba(14,14,15,.5), --edge rgba(255,255,255,.17)`: this is how the FAQ looks
lines	`dashed 1px rgba(255,255,255,.22)` in facts, `.14` in the price list

CONTRAST PAIRS (WCAG)

Aa	text on ink	17.3 : 1
Aa	dimmed on ink	11.5 : 1
Aa	light amber on ink	12.3 : 1
Aa	amber on ink	9.1 : 1
Aa	muted on ink, small labels only	5.8 : 1
Aa	"on accent" on amber, buttons	8.8 : 1
Aa	white on amber: do not use	2.2 : 1

Rule: text on amber is always #170F04 (--on-acc). The site does this everywhere, including text selection, the selected tile in the booking form and the dark button on hover.

BANNED COLOURS

Red, purple, cyan and acid colours. The brand went through red and purple versions and dropped them (in CSS: "red-only glitch, no cyan", "chrome and amber palette instead of violet"). The --red token keeps its historic name but equals amber.

CHROME AND LIGHT

TYPEFACES

POSTER, HAND, TEXT, UTILITY

all from Google Fonts, with Cyrillic. A fifth, decorative one: **Rubik Glitch** (--f-spray), only the marquee and even items of the mobile menu

DELA GOTHIC ONE

Poster headlines, buttons, menu, tabs, prices and numbers. Always uppercase.

`--f-poster, a single 400 weight. CSS sets .poster to 700, so the browser draws a synthetic bold on h1 and h2.`

WALL OF WORK

ABCDEFGHIJK 0123456789 BYN

RUSLAN DISPLAY

Handwritten caption under a headline: "of work", "no surprises", "even in 10 years ✦". Always lowercase, light amber, on its own line.

`--f-hand. Size max(.44em, 24px) of the headline, shadow 0 2px 0 #000`

NO SURPRISES

FINE LINES AND COLOUR, REALISM AND SLEEVES

ONEST

All text: paragraphs, FAQ answers, descriptions, form fields. 400 regular, 600 for calculator chips.

`--f-body, 17px / 1.6 on the site`

Two artists, 8+ years of experience. We'll discuss your idea for free and name the price before the session. **Peeling and itching are normal.**

PT MONO

Utility: work captions, price list, field legends, address, footer, form steps.

`--f-mono, 12-17px, tracking .02em; uppercase captions tracked .1-.12em`

01 Minimum, up to 1 hour ..... 180 BYN

button, menu	GET MY TATTOO PRICE	15 px button, 13 px small and menu, 12 px tabs; tracking .04em
utility	3 short questions. No obligation.	PT Mono 12-13 px

SETTING RULES

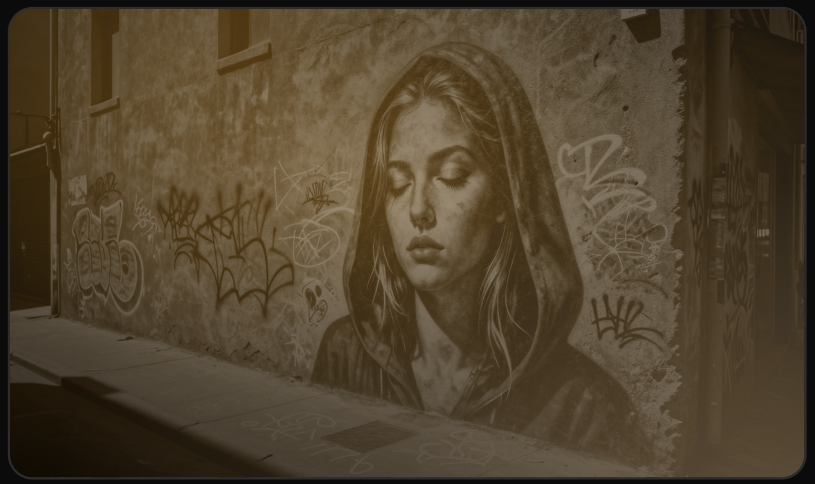

- Headline - uppercase Dela, line height 1 (.98 on mobile), tracking .015em (mobile .03em).
- The Ruslan caption always sits on its own line under the headline, never tilted.
- Text no wider than 52-70 characters. Paragraphs and captions are left-aligned, text-wrap: balance on short ones.
- Calculator numbers are tabular (tabular-nums).
- Headline sizes are fluid (clamp), the first screen scales with the panel width (cqi), not the window.
- Hyphenation in headlines is off (hyphens: none).

Pixels are for a 1440 px window, computed by the browser.

TEXTURE

A night street behind glass

The site background is not an image but a scene of five layers. All are fixed to the window and sit under the content.

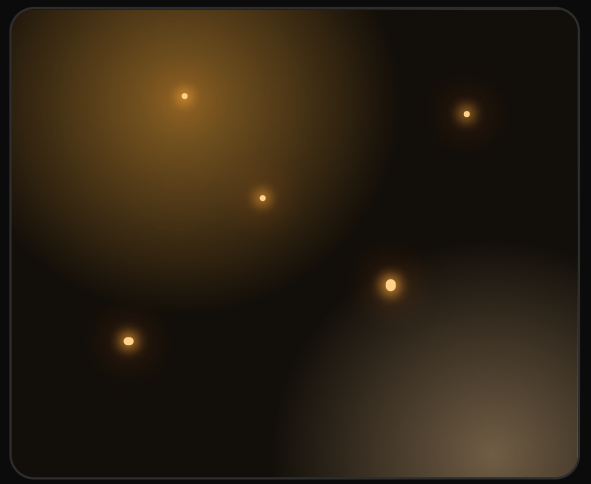

1. Mural, warm b&w

A b&w graffiti photo (img/mural.jpg, 2000 × 1142; mural_tall.jpg on mobile) is blended in luminosity mode over brown #3B2D1B and darkened by a veil rgba(10,8,5,.42 → .62). The result is a warm monochrome with no pure grey.

2. Grain and scanlines

SVG feTurbulence noise (baseFrequency .8, 3 octaves), opacity .14, overlay mode. On top - VHS lines: 1 px every 3 px, rgba(0,0,0,.22), opacity .5.

3. Light and embers

Three amber blobs (80 vmax, screen mode) drift over 19-27 s, a diagonal flare passes every 14 s. 26 embers of 2-5 px rise from below over 9-19.5 s.

Star ✦

A four-point spark, the brand's only icon. Marquee bullet, the "plus" in the FAQ, dots on the aftercare scale, twinkle by the logo, burst on button click.

Vignette

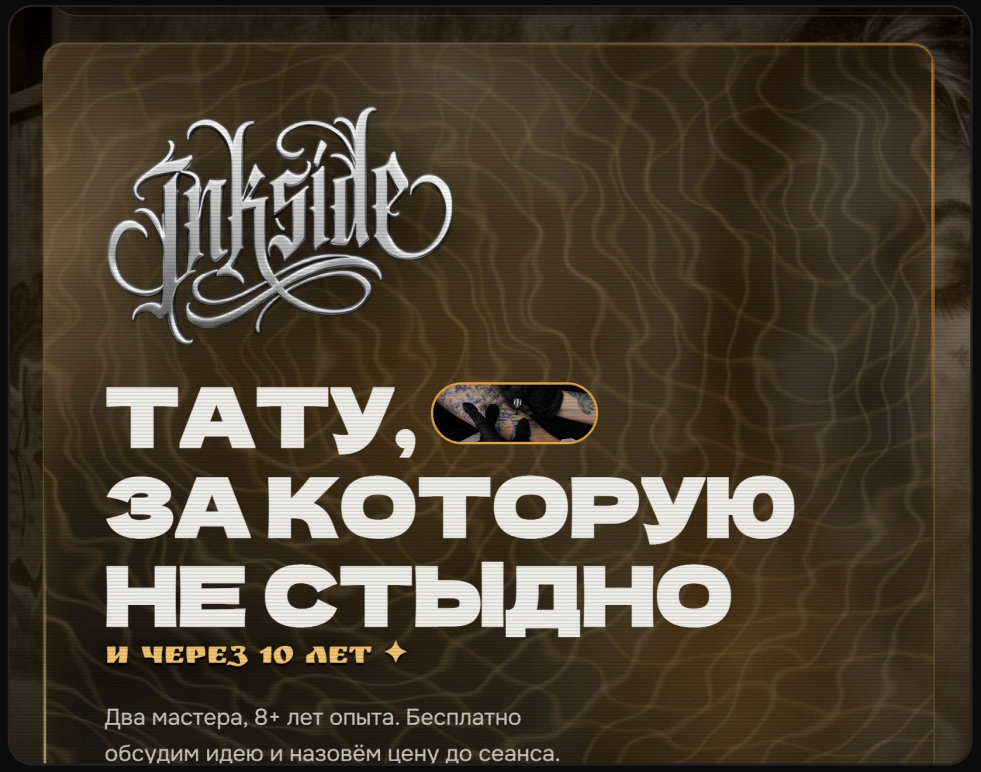

radial-gradient(110% 85% at 50% 35%): from transparent in the centre to rgba(0,0,0,.88) at the edges. Content always sits in the brightest spot.

What's not there

Illustrations, stock photos, pictogram icons, paper stickers and tilts (removed in the latest version), drawn graffiti over the background.

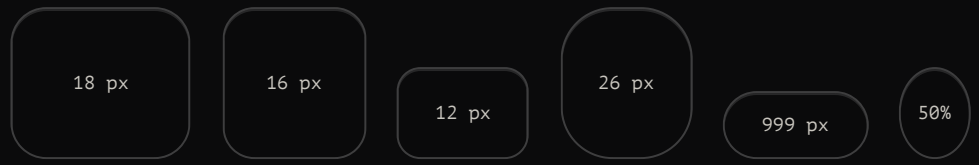

LIQUID GLASS

FIRST SCREEN PANEL

The only panel with its own light. Amber glass (160° gradient), caustic ripples under the text: blurred blobs through an SVG feTurbulence + feDisplacementMap filter (scale 70), drifting 22 s and 15 s. A conic-gradient highlight runs along the edge in 7 s, a sheen crosses the surface every 9 s. The filter is off on mobile.

RADII

18 px (--r)	glass sheets, price list, artists, FAQ, map, photos in blocks
20 px (--r-md)	address rows, dropdown menu items
16 px	work frames, booking tiles, input fields, toast
12 px	buttons (not pills but a "stamp")
26 px	gift card
999 px	navigation, tabs, calculator chips, badges
50%	"Book now" record badge, burger, gallery buttons

SHADOWS

sheet	`0 30px 80px rgba(0,0,0,.5) + inset 0 1px 0 rgba(255,255,255,.12)`
artist, frame	`0 40px 90px rgba(0,0,0,.6)`
work	`0 18px 40px rgba(0,0,0,.5), hover 0 24px 60px .6`
gift card	`0 40px 90px rgba(0,0,0,.7)`
accent	`amber glows only, no coloured shadows`

WORKS

WE SPEAK IN TATTOOS

Each piece gets its own shot, no stock and no text over the tattoo.

- **Dark neutral background.** Black or graphite fabric, skin is the brightest thing in frame.
- **Vertical.** Sources about 3:4 (1050 × 1400), cropped to 4:5 centred on the wall. Before-after is square.
- **Watermark.** IS monogram in the bottom right, about 12 % of frame width, semi-transparent silver.
- **Frame on the site.** #111113, 8 px margin, 40 px at the bottom for an uppercase PT Mono caption: title left, style right.

dagger graphic

portrait b&w

in colour colour

cover-up before and after in one shot

geisha colour

Artists

Reportage of work in the studio: ring light, dark interior, machine in hand, eyes on the work, not the camera. Vertical 9:16 (788 × 1400), cropped to 4:5 on the site. Shown in b&w by default (grayscale + contrast 1.05), colour appears on hover.

HOW TO SHOOT

A NEW PIECE

- **Light.** Soft and diffused, from the side and slightly above. No flash and no glare from the film: shoot before the film or after healing.
- **Background.** Dark plain fabric, no furniture, walls with sockets or windows.
- **Cleanliness.** Skin wiped clean of ink and plasma. No gloves, wipes, bottles, film or other hands in frame.
- **Angle.** Camera perpendicular to the design, the whole piece in frame, margins for a 4:5 crop.
- **Format.** Vertical, at least 1400 px on the long side. Sleeves and legs - a wide shot and details separately.
- **Cover-up and touch-up.** "Before" in daylight from the same angle as "after".

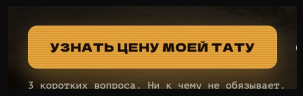

EDITING

- Don't change the tattoo's colour or saturation, don't redraw lines. The photo must match what a person sees in real life.
- Neutral white balance, skin without an orange or pink cast.
- Light contrast and background darkened to near black.
- Monogram in the bottom right, on a dark area.
- Export to WebP, 1050-1100 px wide, quality about 80.
- Work caption: one or two words, subject and style ("owl, shoulder", "sleeve, b&w").

Artists add new works to the site themselves via the bot: send a photo captioned "#graphic dagger" and the bot puts it on the wall.

BUTTONS AND CHIPS

ONE ACCENT PER SCREEN

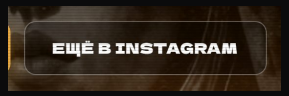

rest

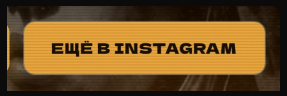

hover

Primary, amber

#E8A33A, text #170F04, border 1px #EEB04C, radius 12px, padding 18 × 28px, Dela 15px uppercase, .04em. Glow 0 10px 30px .35. Hover: a light #F2F0EB fill spreads from the cursor point in .55 s, text turns ink, a short .28 s shake. Press: scale(.97), no shadow.

rest

hover

Dark, secondary

rgba(0,0,0,.35), border 1px rgba(255,255,255,.35), white text, no glow. For a second action next to the primary: Instagram, Telegram, "Call". Hover: amber fill from the cursor point, text #170F04.

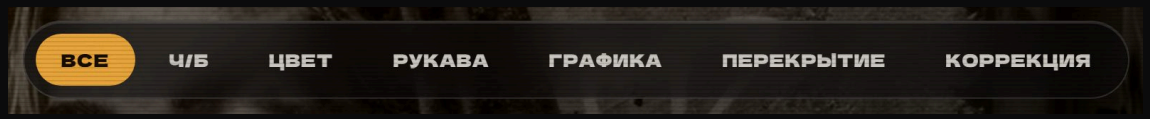

rest

hover

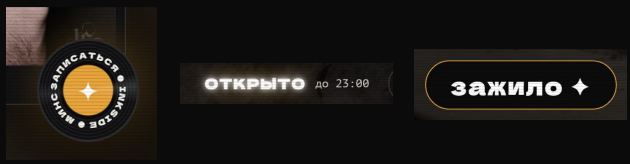

Marker link

Dela 14px uppercase. On hover an amber marker band fills from bottom to top (62-90 % of line height, .85) in .6 s. Phone, Instagram and Telegram in contacts behave the same.

Filter tabs

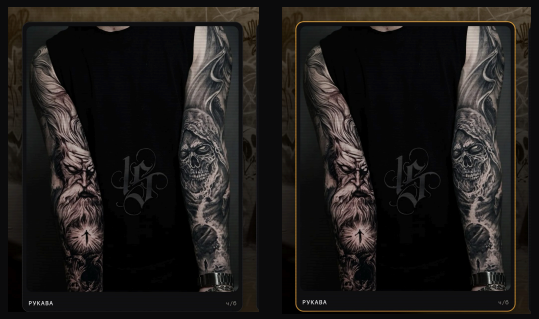

Glass capsule with Dela 12px buttons, padding 12 × 18px. Inactive #C9C6BF, hover white, active - amber capsule with #170F04 text. On mobile they scroll sideways, the right edge fades in a 72px mask. Calculator chips work the same but are set in Onest 600 15px (next page).

Badges

Record badge 88px in the corner: "BOOK NOW • INKSIDE • MINSK" around a circle, 14 s per turn, hides over forms. OPEN / CLOSED by opening hours. "healed ✦": capsule with an amber border. Promo: amber strip above the headline, text set in the bot.

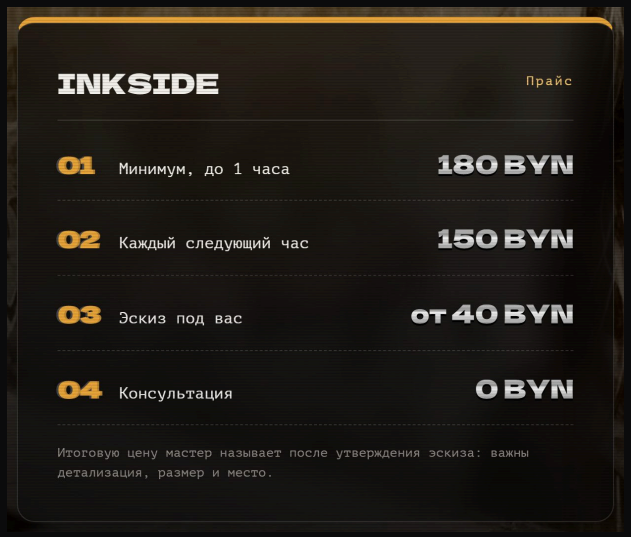

WORK CARD

Rest and hover. Frame #111113, edge rgba(255,255,255,.12), radius 16px, 4:5 photo with 12px rounding. On hover the card lifts 6px, frame and outline turn amber. A click opens a full-screen view: same 12px frame, 56px at the bottom, rgba(5,5,5,.9) blurred background.

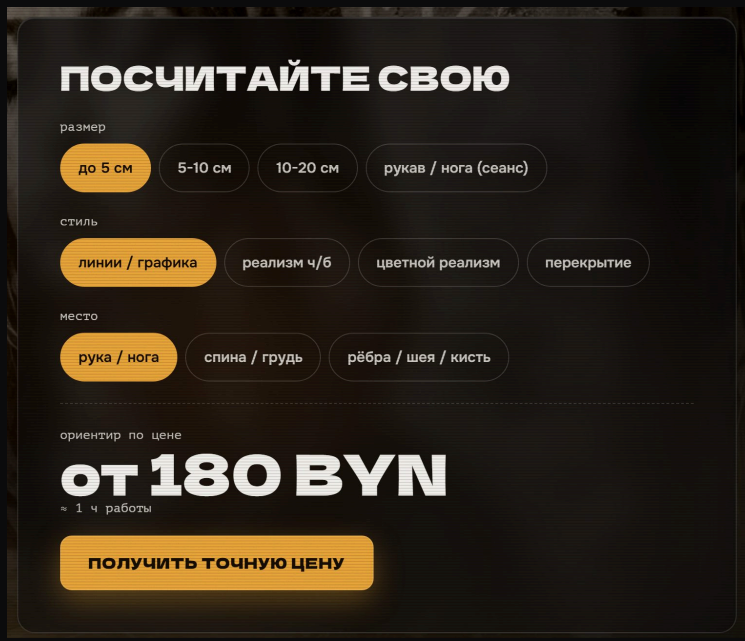

Wall: 3 × 2 on desktop (six selected works in different styles), a "show all" button, 2 columns on mobile.

CASSETTE PRICE LIST

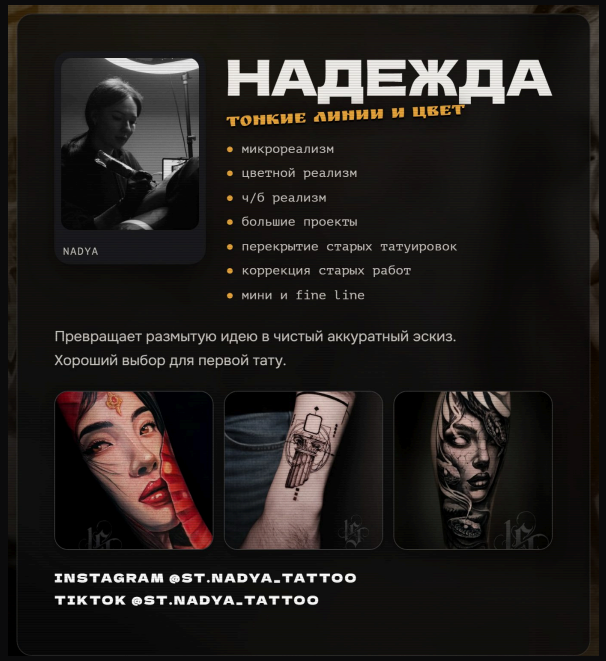

A glass sheet with a 6px amber band on top, like a cassette insert. Header: INKSIDE and "Price list". PT Mono 16px rows: Dela number in amber with a shift, item name, price in chrome Dela 26px. Dashed lines between rows, a row highlights rgba(232,163,58,.12) on hover.

CALCULATOR

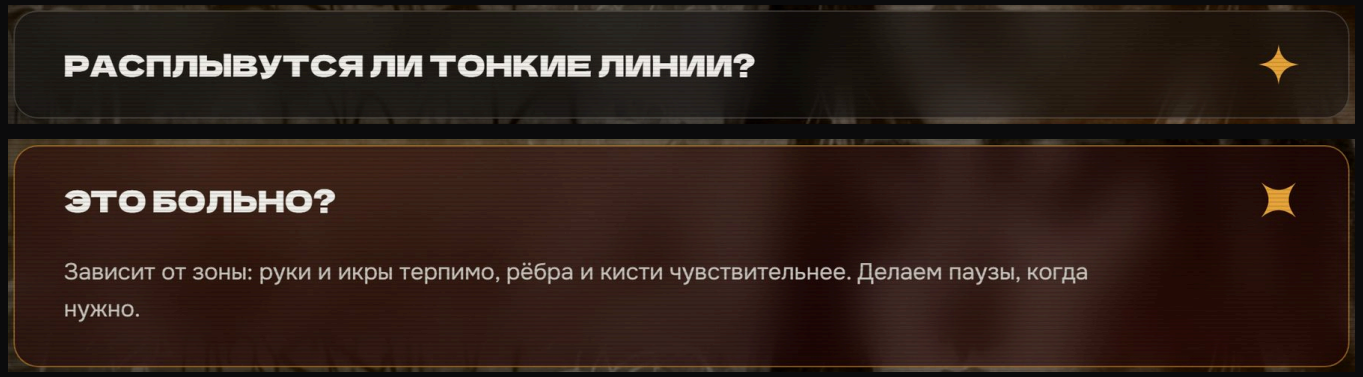

Three chip groups: size, style, placement. A chip is a capsule, Onest 600 15px, border rgba(255,255,255,.17); selected - amber with #170F04 text. Total in Dela 58px, "from 180 BYN" and "≈ 1 h of work". The "Get an exact price" button opens booking.

ARTIST CARD

Sheet rgba(12,12,14,.82) with blur, radius 18px. Photo in a #1A1A1D frame with a Latin caption, name in Dela, Ruslan caption, PT Mono list with amber dots ●, three works as squares, social links as markers. Both cards are the same height.

FAQ

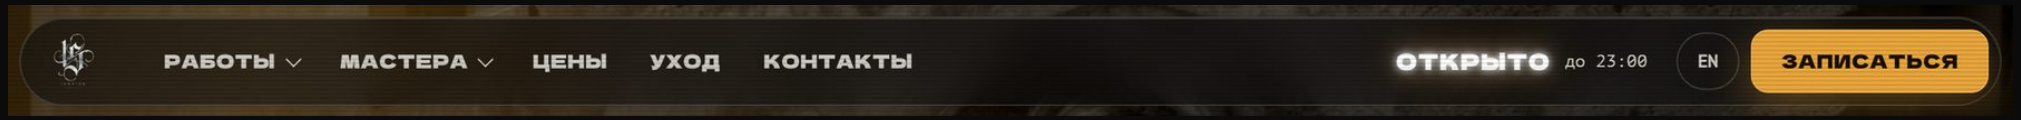

Accordion on <details>: --glass, question in Dela 22px, a light amber star on the right. Open: background rgba(40,8,10,.55), amber border .55, the star rotates 135° and grows 1.2x (.5 s, spring), the answer slides in 10px.

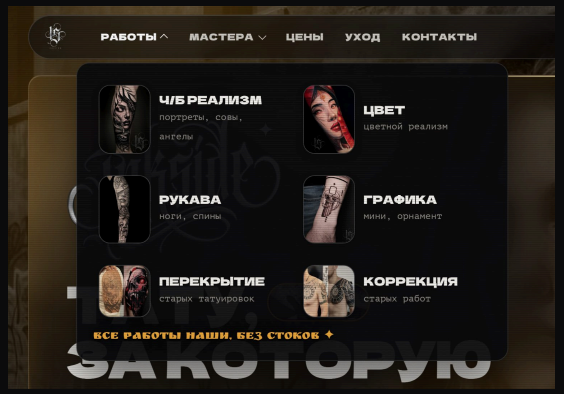

CONTACTS

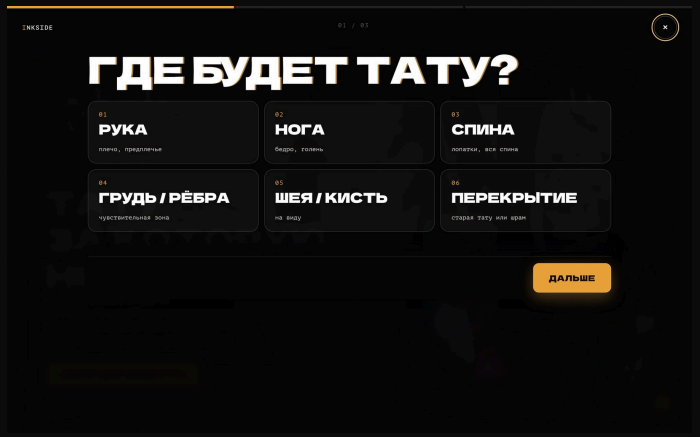

Address in Dela, sized from the card width (7.2cqi, up to 58px), always on one line. Below, a Ruslan caption "unit 64, come on in ✦". PT Mono rows on rgba(255,255,255,.05), radius 20px. On the right an interactive globe with a Minsk pin and a "Globe / Map" toggle, links to Yandex and Google Maps.

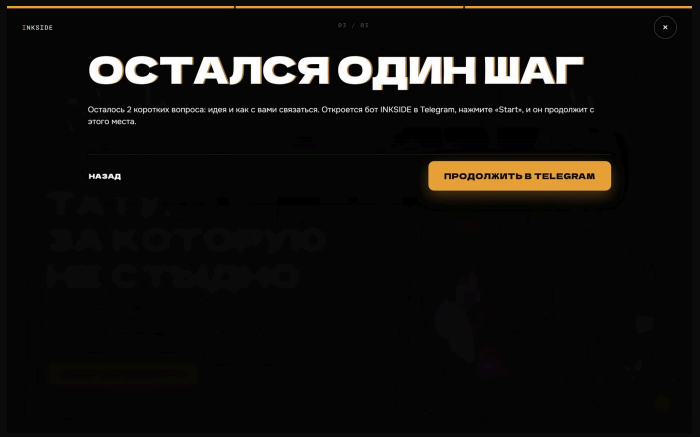

NAVIGATION

Full-width glass capsule, 12px from the top. Monogram 38px on the left, Dela 13px #C9C6BF items, the active section lit rgba(232,163,58,.35). "Works" and "Artists" open dark rgba(12,12,14,.95) sheets with thumbnails. On the right the OPEN neon, EN toggle and a small "Book now" button. Hides on scroll down, returns on scroll up (.5 s). Below 1100px a burger replaces the items.

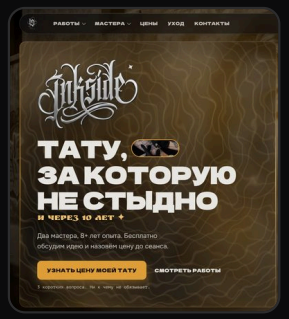

Booking

Now every "Book now" button opens @inkside_bot in Telegram straight away (tag ?start=site), and the bot asks the questions. When the server is connected (CFG.api), a full-screen three-step form opens instead: tattoo placement, size with a "from ... BYN" price, name, idea and phone with consent. One decision per screen, a three-segment progress bar (active one amber with a glow), a 01 / 03 counter, tiles 3 per row with 18px radius, the selected one fills amber.

STRUCTURE

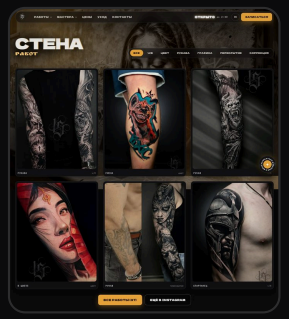

ONE LONG PAGE

The order leads from trust to booking: first the promise and the work, then price, process and people, finally removing fears and contact.

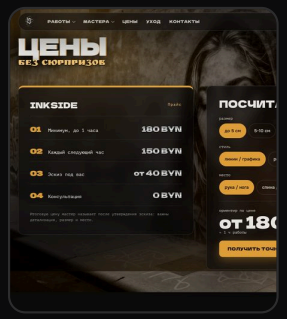

01 FIRST SCREEN

Promise, price before the session, "Get my tattoo price" button, 3 photos

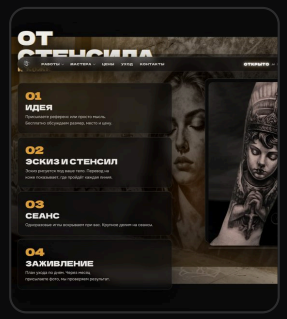

02 WALL OF WORK

Style filter, 6 works, show all, Instagram

03 PRICES

Cassette price list and calculator leading to booking

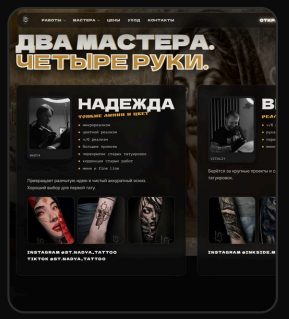

04 PROCESS

From stencil to skin: 4 steps, the shot develops on scroll

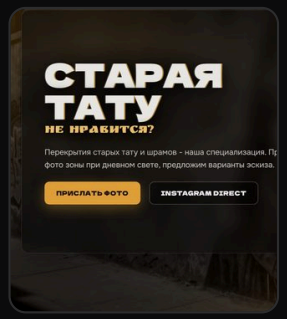

05 FACTS

8+, №1, 2, 0 BYN in chrome

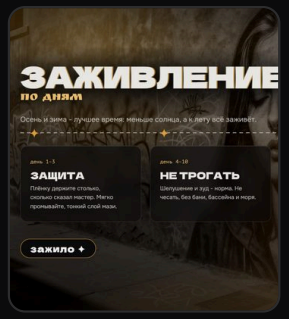

06 ARTISTS

Two cards, specialities, social links

07 COVER-UPS

Offer for old tattoos, "Send a photo" to the bot

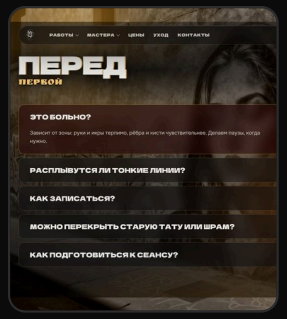

08 AFTERCARE

Healing by day, the scale fills up

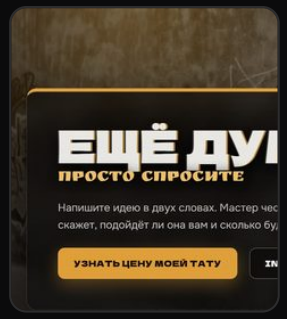

09 GIFT CARD

A tattoo as a gift, ordered via the bot

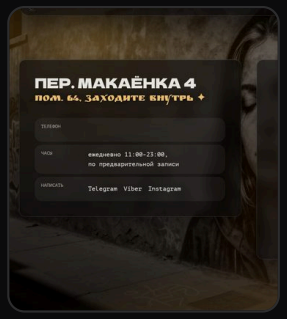

10 FAQ

Five fears before a first tattoo

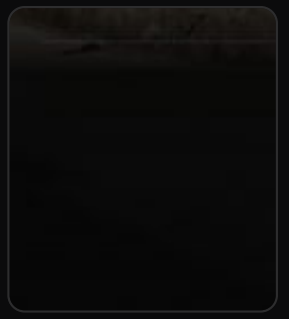

11 LAST CALL

"Still thinking? just ask", three channels

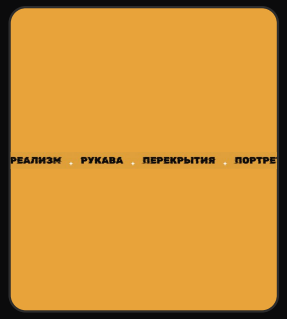

12 CONTACTS

Address, hours, globe and map

13 FOOTER

Legal entity, registry, privacy policy

+ ALWAYS THERE

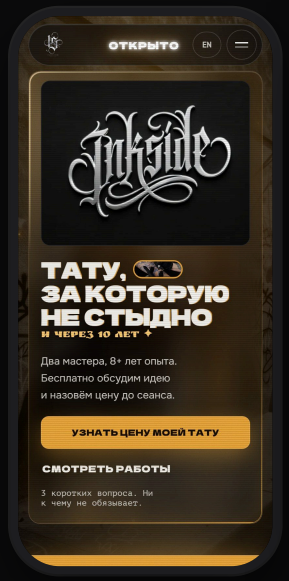

Menu, booking badge, marquee after the first screen

A separate privacy.html page - the privacy policy in the same dark palette. Bot links carry a source tag: ?start=site, cover, gift.

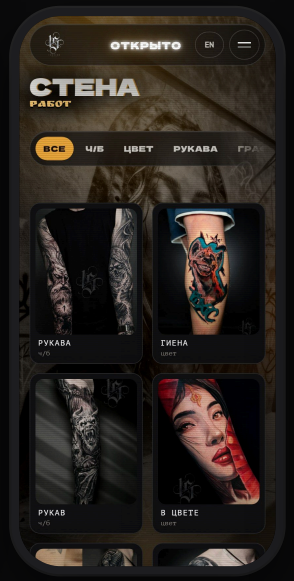

MOBILE

390 × 844, ONE COLUMN

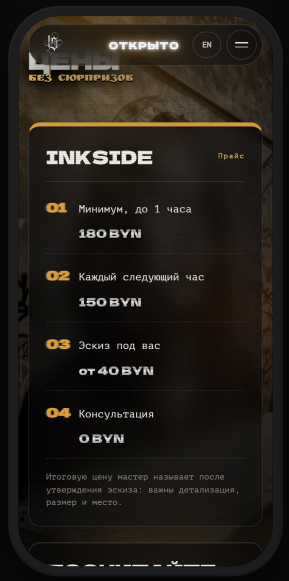

- **Below 1100 px** the menu collapses into a burger that opens as a round full-screen "blot".
- **Below 900 px** everything goes to one column, the three first-screen photos are hidden, the logo sits on the photo, the button goes full width. The button is visible on the first screen.
- **Process** turns from a scroll scene into a plain list of steps.
- **Wall of work** in 2 columns, tabs scroll sideways.
- **Record badge** 64 px, hidden on screens narrower than 440 px.
- **Booking** currently goes straight to the bot. The form (with the server connected) is full-screen, tiles 2 per row, "Back / Next" stick to the bottom.

MOTION

INK, STAMP, SPARK

what	how	time
Loader	an ink circle shrinks and reveals the page	1.1 s power4.inOut
First screen	the panel rises, headline letters lift out of a mask	1 s expo.out, letters .9 s, stagger .025
h2 headings	letters rise from a mask, the Ruslan caption "pops in"	1 s, stagger .018; .8 s back.out(2.2)
Works	cards drop onto the wall with a light bounce	.8 s back.out(1.6), stagger .08
Numbers	count up from zero with a burst of sparks	1.4 s power2.out
Process	the stencil draws, the photo develops, a "HEALED" stamp	tied to scroll
Menu transition	an ink blot from the click point	.55 s + .7 s
Buttons	fill from the cursor point, shake, 5 sparks	.55 s, .28 s × 2
Scrolling	smooth, Lenis	lerp .09
Background	light blobs, flare, embers, neon, logo shine	19-27 s, 14 s, 9-19.5 s, 6 s, 5.5 s
h1 glitch	every 6 s for 0.3 s an amber / white shift	6 s, frames 91-95 %

CURVES

`--out cubic-bezier(.22, 1, .36, 1)`
entrances, reveals

`--spring cubic-bezier(.34, 1.56, .64, 1)`
stamps, stars, dropdowns

PRINCIPLES

- Motion is physical: a stamp "slaps", a card drops, ink spreads. No spinning for its own sake.
- Only transform, opacity and clip-path are animated.
- Background motion is slow (6 s and up), user actions are fast (under 1 s).

Reduced motion

With prefers-reduced-motion: reduce, all animations and transitions are off: no loader, smooth scroll, embers, cursor or magnifier. The process scene becomes a static list with the finished photo shown at once.

TELEGRAM BOT

@INKSIDE_BOT

The bot is the main booking channel. Every button on the site leads to it. It speaks in the artist's voice: short, to the point, one emotion per message.

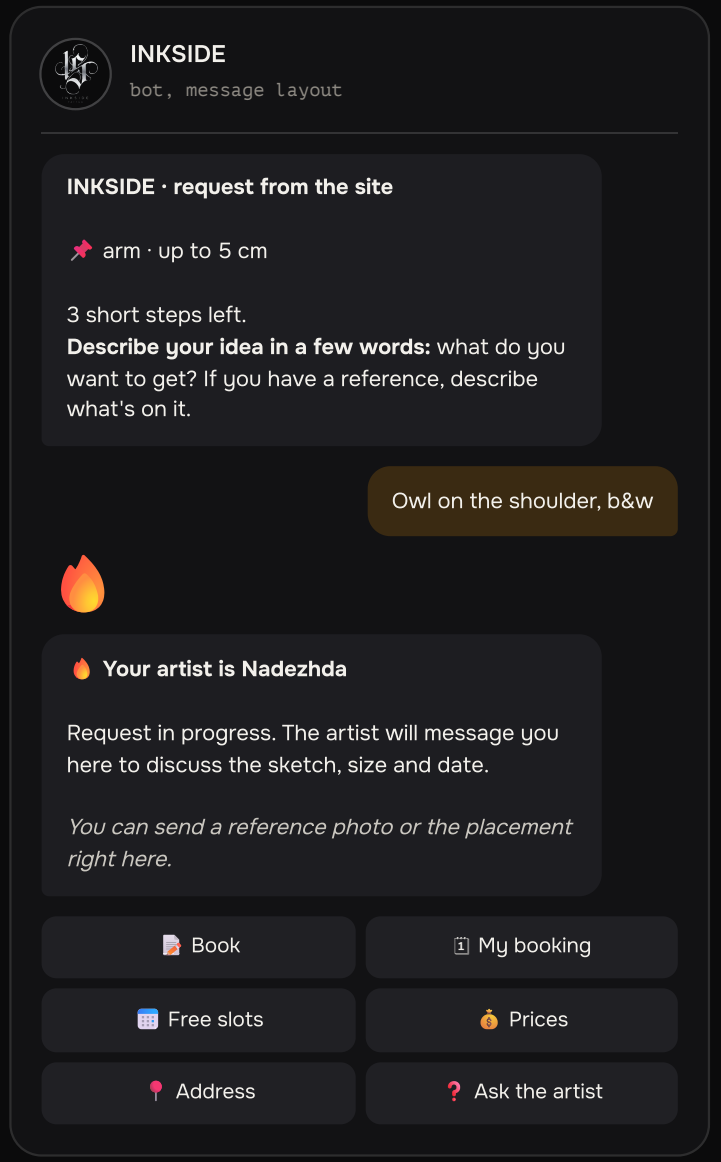

MESSAGE STYLE

- First line in bold - the gist: "You're booked at INKSIDE", "Passed to the artist".
- Details in short lines, notes in italics.
- Prices always with BYN, time 11:00-23:00, dates 12.10.
- Every message ends with the next step.
- Key moments get a separate emoji sticker: 🔥 artist took the request, 🎉 booking confirmed, ⏰ reminder.

BOT EMOJI

📝 🗓 📅	book, my booking, free slots
💰 📍 ❓	prices, address, ask the artist
🔥 🖤 🎉	request in progress, booking, celebration
⏰ 🎁 ▪	reminder, gift card, list item
😴 🍽 🚫 👕	session prep

No more than one emoji at the start of a line. No coloured hearts except 🖤.

message texts are taken from the bot code (backend/app.py); the window design is schematic, not a Telegram screenshot

INSTAGRAM

@INKSIDE.MINSK

brand book recommendations: the site has no social media rules, these extend its style

- **Feed = wall of work.** 4:5 photos on a dark background, monogram in the corner, no text over the tattoo. Alternate b&w, colour, sleeves.
- **Reel covers.** Dela uppercase headline up to three words + Ruslan caption in light amber, bottom of the frame darkened.
- **Stories.** Background - mural or ink, one amber sticker button linking to the bot (t.me/inkside_bot?start=...).
- **Captions.** As on the site: what was done, how long it took, who the artist is. Price as "from ... BYN".
- **Highlights.** Covers - star ✦ or monogram on ink, named after site sections: Works, Prices, Aftercare, Reviews.
- **Don't.** Red and purple filters, white background, other people's work, stock images, long dashes.

GIFT CARD

Card 1.6 : 1, dark metal (135°, #2D2D2F → #0B0B0C → #3B3B3E), radius 26px, border rgba(255,255,255,.28), a shine passes in 4.5 s. Chrome logo 170px on top, "GIFT CARD" in PT Mono 12px and the amount in chrome Dela 44px below. On the site the card is tilted -6° and straightens on hover.

Print: 85 × 53 mm or an envelope, same colours, logo at least 30 mm. Any amount, ordered via the bot (?start=gift), "especially popular before New Year".

POST AND STORY

BUILT FROM SITE ELEMENTS

Post 4:5 (1080 × 1350). The work fills the frame, monogram in the corner, bottom fades to ink. Dela headline with colour shift, Ruslan caption, PT Mono utility line: artist and style.

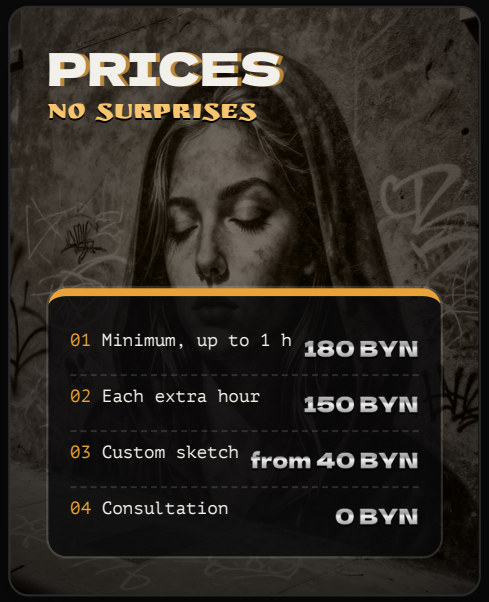

Price post. Ink and mural, the cassette price list unchanged.

Story 9:16 (1080 × 1920). Mural with amber light, logo on top, work in a #111113 frame, one amber button at the bottom. Safe zones of 250 px top and bottom.

Mockups to scale, built in Figma or Canva from these values.
